

EPA Perspective RPO/MJO EI Panel

Doug Solomon -US EPA
18th International Emission Inventory Conference
Baltimore, Maryland
April 14, 2009

Benefits of RPO/MJO EIs

- Excellent technical work!
- Promotes consistency within their States
- Focus on sources of regional importance
- Increases attention on modeling

EPA's Program

- Need for EI for large domain
- Need to pay attention to important regional sources
- Struggle with consistency vs. precision issues
- Broad use and client base (Air Toxics)
- Large collection of data suppliers

Future Directions

- Less money & time may reduce “dueling inventories”
- More collaboration up front (e.g., ERTAC)
- NEI/EIS more valuable resource
